PPE

TBP

PPE

- **Hand hygiene** must be performed **BEFORE** and **AFTER** removing PPE.
- Personnel entering the room of a patient on **CONTACT** precautions must don an approved **gown** and **gloves** prior to entering.
- Personnel must **remove gown and gloves** and appropriately **discard** them **before exiting** the patient's room.

TRANSPORT

- **NOTIFY RECEIVING DEPARTMENTS IN ADVANCE**
- **Limit transport** and movement of patients outside of the room for medically necessary purposes
- Ensure that **infected** or **colonized areas** of the patient's body are **contained** and **covered**.
- **Remove and dispose of contaminated PPE** and perform hand hygiene **before** transporting patients.
- **Don clean PPE** to handle the patient **at the transport destination**.

VISITATION

- **Limit visitors** to those necessary for the patient's emotional well-being and care.
- **Instruct visitors to perform hand hygiene upon entering and exiting the room.**
- Educate visitors on proper **respiratory hygiene** and **cough etiquette** practices.
- Show visitors the correct way to **put on and remove PPE** (refer to the QR code above for reference).
- Provide visitors with a **gown** and ensure they are worn for the **duration of their visit**.
- Provide gloves as appropriate.

DECON

- Clean and disinfect **high-touch surfaces at least daily** and as needed with hospital-approved disinfectant.
- Ensure surfaces **remain wet** with the disinfectant for the **required contact time specified by the product**.
- **Disinfect shared equipment** after **EACH USE** (e.g., glucometers, imaging equipment, and wheelchairs).
- **Do not remove the isolation sign** until after EVS has terminally cleaned and disinfected the room.
- **Replace disposable curtains after discharge**
